

District cooling certificate 2024

It is hereby certified that Stockholm Exergi for the calendar year 2024 will purchase renewable guarantees of origin for the electricity used to produce district cooling for Stockholm Exergi's district cooling network. This means that all district cooling that Vasakronan AB purchases during the year 2024 from Stockholm Exergi is to be considered 100% renewable.

Stockholm Exergi annually publishes detailed data regarding the environmental performance of district cooling in Stockholm on its website. In 2023, the electricity allocated to the district cooling production consisted of 13 % hydropower and 87 % biopower.
